

THE ILUMINATIS: THE SECRET TO VOICES

"The Enlightened of Bavaria", better known as "Illuminatis" translated from Latin means "Enlightened" was a secret organization created in the age of The Enlightenment, more specifically on May 1, 1776, which sought to oppose religious and government power, it is believed that several important figures of renown such as Adam Weishaupt, who was its founder, Carlos Theodore, Adolph von Knigge and Johann Wolfgang von Goethe. With the help of the church, the government dissolved this organization in 1785. But he is said to have re-emerged to lead the French revolution.

There are several conspiracies related to this organization, such as that they rule the world in secret, I see many flaws in these conspiracies, such as the fact that an organization, which is highly secret, should be impossible to know of its existence without belonging to that organization, as I mentioned in the title, is an open secret.

I believe that for obvious reasons a person on foot should not be able to know of the existence of an organization which supposedly controls the world government.

In my opinion, I love people's dedication to creating this kind of thing, I think this can be considered as making a fictional story, this becomes entertaining until it becomes an addiction and you start to say that the guy who served you a Whopper at McDonald's is a lizard.
